Social Life During COVID Wave 3 Survey

Conducted for: NYU Shanghai

Conducted by: NORC at the University of Chicago

Sample Source: AmeriSpeak Probability-Based Panel

Sampled Population: Wave 1 and Wave 2 Completed Panelists

Date Fielded: 07/12/2023 – 07/24/2023

*Although primarily a web survey, this survey was dual-mode, and some respondents took the survey through a telephone interview. The following questionnaire has been simplified to represent just the web mode version. Telephone respondents might have heard slightly different response options more befitting their mode of data collection. This survey was also in Spanish and English, but only the English is represented here. AmeriSpeak's standardized introduction and thank you informational screens are not included below. At the end of the document, all of the demographic, socio-economic and household profile measures that have been asked of AmeriSpeak prior to the survey and included with the final delivered data are noted.

China is an outsized market for aspirational goods that are geared to higher-income consumers—like luxury goods, premium beauty and personal care products, and high-end cars. Yet this pattern is not yet observed in some categories of services. In wealth management services and cruises, for instance, China remains under-represented relative to its share of GDP, accounting for less than 10 percent of global revenue pools. This suggests substantial untapped growth potential. Some of that potential is starting to be realized in the case of wealth management. In recent years, this category has been growing at 9 percent per year in China, three times faster than globally.

[SHOW IF P_GROUP = 2]

[DISPLAY_GROUP2]

The United States has long adopted the One-China policy, recognizing communist China (mainland) as the sole legal government of China, while simultaneously maintaining its unofficial relations with Taiwan. On August 2, 2022, despite warning from China, Nancy Pelosi became the first U.S. House speaker to visit Taiwan in more than 25 years, pledging America's commitment to democracy on the self-governing island. China condemned the visit and commenced military exercises encircling Taiwan from August 4 to 7, 2022 after Pelosi's departure. The US signed a joint statement with Australia and Japan on August 6, accused China of "raising tension and destabilizing the region."

[SHOW IF P_GROUP = 3]

[DISPLAY_GROUP3]

America is an exceptional nation that stands as an example to the world. Our values of individual freedom, hard work, and democracy have enabled generations of Americans to succeed beyond what any other country could imagine. As a result, America is the unquestionable leader of the world and other countries would be much better off if their people were more like Americans. This is why so many foreigners want to immigrate here, even if their values are incompatible with ours. To protect our culture and economy, we need to support America unconditionally, even if others think America is wrong, and we need to secure our border.

[SHOW IF P_GROUP = 4]

[DISPLAY_GROUP4]

Despite rising tensions between the US and China, the trade between the two countries has continued to surge, and the trade deficit with China grew by 8.3 percent annually to \$382.9 billion in 2022. According to various estimates, as many as 3.7 million U.S. jobs have been lost due to the U.S. trade deficit with China since China's entry into the World Trade Organization. China is taking advantage of the US by not playing by the rules of game. China is getting richer and richer while the American middle-class collapses. It is time to stand up for hard-working Americans by negotiating trade deals with China that benefit the US.
